Four Teachers (including Miss Wilson) teach different classes (one is Spanish) at Valley Elementary. Each of their respective classes had different semester averages (one class averaged a score of 95). From the clues below can you determine which teacher taught which subject and what their average scores were?

**CLUES -**

Miss Jones taught either Art or History.

Mrs. Taylor's students averaged above 85 for the entire semester.

Mr. Smith did not teach either Spanish or Art (one of these classes finished with an 80 average).

Miss Wilson taught Music.

Mr. Smith's class averaged higher than any of the women teachers classes.
