Last week three sets of classmates (one who was named Stan), participated in Edison Elementary’s annual three-legged race. Ann, Mary, and Stan were all on separate teams. They finished in some order (1st, 2nd, or 3rd). From the clues below can you determine who paired with whom, and in what order did they finish?

**CLUES:**

1. All 3 boys had girls as partners. Fred did not finish 1st, nor was Ann his partner.
2. Sally and her partner won.
3. Mary and her partner finished 2nd behind Stan and his partner.
